**Date: October 23, 2000**  
**Subject: Phone call with Clinton Finn (DNR)**

This morning I received a phone call from Clinton Finn, DNR, concerning your phone conversation with him about 4725 W. La Siesta. Mr. Finn indicated that when he talked to you he was told to contact one of the inspectors if you were not in the office. He said that he was investigating a complaint that the individual at the above address was disposing of power washing wastewater in the storm sewer at that address. Mr. Finn wanted to know what creek the storm sewer would be tributary to. I told him that I would investigate the complaint and get back with him.

At approximately 1:45 pm I inspected the storm sewer in front of this address and found evidence of what appears to be lint, dirt, etc. on the sides of the curb inlet. From the location of the debris it appears that it was dumped into the curb inlet. The storm sewer discharges to a detention basin at the corner of Lulwood and Burbank. From there the water travels east in a drainage ditch to North Wilson Creek

I printed a 15,000 scale GIS map of the area showing the drainage from the address in question to North Wilson Creek and took the map to Mr. Finn this afternoon. I gave him my card and told him that if he had any other questions or need any other information about this situation to call me.

4725 W. La Siesta
